

# International Conference on **EDUCATING FOR SUSTAINABILITY ACTION**

*Deliberating the role of education in sustainable development and benchmark global essential learnings in the environment for all.*

 January 9-11, 2025

 CEE Ahmedabad

# Introduction

Dealing with the triple planetary crises requires urgent action at various levels – by communities, decision-makers, educators, government, and businesses. The years 2025 to 2030 are crucial for SDG progress in achieving the 2030 Agenda for Sustainable Development. This period presents an opportunity to fully harness the power of education for sustainability action, especially to highlight pedagogy and resources and identify the need to develop strategic education interventions. The international conference 'Educating for Sustainability Action' is a crucial platform in this regard.

## Who can participate

**Academicians | Practitioners | Corporates | Entrepreneurs | Policymakers | Community Groups | Teachers | Youth**

## Some Discussion Questions

- What is the minimum environmental literacy every person should have?
- How can EE facilitate policy implementation to engage and benefit at the local level?
- How can EE help provide skills and build conducive environments for entrepreneurship?
- What opportunity does environmental education provide to instill values to minimise and resolve conflicts?
- What are the ways to effectively build teacher capacity, pedagogical approaches and tools?
- How can EE's access to financial resources be leveraged or increased?
- How can EE use upcoming technologies like AI to create enabling learning environments?
